

## PHASES OF THE DRUG INTERVENTION PROGRAM

The Drug Intervention Program is a 12-month program divided into four phases, including a Continuing Care phase. You must successfully complete each phase before progressing to the next phase. Each phase has a key concept or focus.

| <b>PHASE ONE</b>                                                                                                                                |                                                                                                                                                                                                                                                                                                                                                                              |
